

Application Interface Overview

Get Started

FreightTracer Shipment tracking made simple.

25

Contents

Thank you for your interest in FreightTracer. This Application Interface Overview will give you a high-level look at the screen interfaces for the top-level navigation areas of the application and the features they offer. Although you can navigate pages using the standard options in your PDF viewer, this document is also interactive and offers click-through options on each page. To begin, select a top-level screen below, or start with <u>Registration</u>.

Company & User Info | Payment Information & Confirmation

Corporate Code	Freight Tracer E POWERED BY FREight Exchange Network	
The Corporate Code can be sent via a link or directly. If within a link, this field will be pre-populated and won't be editable by the applicant.	Company Sign-up Create Account	
Federal Tax ID	Company Profile Information	Administrative User Information
The Federal Tax ID is a crucial component of the customer account and is required.	Preferred Starting Shipment ID* 100000 Company Name*	First Name*
Average Monthly Load Volume	Federal Tax ID* Average Monthly Load Volume:*See Pricing 1-50 LPM	Password*
Our tiered pricing structure is based on Average Monthly Load Volume. At this point we ask applicants to select a load range based on their current volume. Once the account is active and tracking shipments, we will monitor volume to ensure proper pricing is applied.	Company Location Address 1* Address 2 City * State*	Enter Captcha here Continue Cancel
Company Location Company address and phone number provided here.	Select State Postal/Zip Code * Country * USA Primary Phone*	

Administrative User Information

This will be the main administrative user for the account. Applicants will need to enter a valid email address that's not already in the system. They will also need to enter and confirm a valid and strong password (password strength meter provided).

CAPTCHA Form Security

We use CAPTCHA to secure our registration form by preventing automated account creation attempts.

Dashboard

Load Statistics

Users can get a quick glance summary of the status of current loads, including late pickups and late deliveries.

Filterable Load Map

The map will show a status icon for all active loads. The map can be filtered by active loads, late pickups, late deliveries, reference/PO number, shipment ID, or status. The map's refresh rate can be set by th user and the map can be collapsed and hidden from view on the page.

Load Details

Each load icon on the map can be clicked to reveal a summary of load details. Clicking the Shipment ID will take the user to Load Sheet for that load. The Driver's email address is also accessible here.

Next: Location Profiles

Location Profiles

Location Load Statistics

As with the Dashboard, users are able to view quick statistics associated with each of their locations, including number of active current loads, number of loads for the current month, and number of loads for the previous moth. They can also see percentages of on-time pickups and on-time deliveries.

Location Info

Users can scroll through or search their list of locations. Selecting a different location will refresh the page with the appropriate information.

Users can also create new location profiles, save changes, cancel changes or delete locations with the buttons above.

Notes & Attachments

Users can save any notes they need about each location, such as details about their location, billing preferences, employees, etc. Attachments, such as contracts, billing agreements, etc., can also be uploaded and stored.

Carrier Profiles

Carrier Statistics

Users can see a quick summary of the carrier's performance, including overall score, score for last 25 loads, current loads, and the total loads hauled. They can also see percentages of on-time pickups and on-time deliveries.

Carrier Info

Users can scroll through or search their list of carriers. Selecting a different carrier name will refresh the page with the appropriate information.

Users can also add new carrier profiles, save changes, cancel changes or delete carriers with the buttons above.

Notes & Attachments

Users can save any notes they need about each carrier, such as details about their location, billing preferences, employees, etc. Attachments, such as contracts, billing agreements, etc., can also be uploaded and stored.

Carrier Load Map

Shows each load associated with the carrier and its status.

Driver History

Displays a list of the carrier's drivers who have transported loads for the user's company, showing completion date, shipment ID, name, phone number, and email address.

Load Data Table

This is a list view of loads associated with the carrier that are displayed in the map.

Loads

Shipment Info

Users can scroll through or search their list of loads. Selecting a different shipment ID will refresh the page with the appropriate information. Users can also modify the load's status, as well as the score once the load is completed.

Carrier Info

When creating a load, users can select the carrier they want to use. Contact info and the carrier's score will appear below the name. Driver information can be added once the load has been dispatched.

Shipment Costs

Users can enter the cost for the load, either as a flat rate or price per pound, and any assessorials associated with the load.

Carrier Notes

Any additional information about the carrier can be stored here.

Load Sheet Controls

With these control options, users have the ability to save or cancel any changes made, delete the load sheet, create a new load, duplicate the load (which saves time when creating multiple loads), dispatch or re-dispatch the load, and view the bill of lading (BOL).

Load Stats

A quick summary of real-time stats while the load is in transit, including shipment miles completed, miles remaining, and drive time remaining.

Load Map

A real-time view of the location of the load and the path it has traveled. User options to manually update the load's location and view map full screen.

Next: Loads Continued

Loads (Continued)

Pick-Up

Users can see and manage information about the pick-up and delivery locations, and each stop along the way, if multiple.

The Pick-up area displays the location information, equipment type, reference information, and truck information. This is also where the scheduling method and scheduled pick-up date and time is determined. After the load is picked up, the actual date and time is displayed along with a status of "On Time" or "Late."

Delivery

The Delivery area displays much of the same information as Pick-up. The user has the ability to add stops and set the order.

The Pick-up and Delivery areas can be collapsed individually or all at once. When collapsed, a summary of information is visible on the header bar.

Load Notes

The user can create and save notes about the load.

Load Activity

FreightTracer records every touchpoint in the shipment process and keeps a running history. This gives the user additional visibility into the shipment's progress every step of the way.

Documents & Attachments

This is where the user can view any documents and attachments associated with the account. These can be documents uploaded by the user or by the driver, such as a Proof of Delivery (POD) when the load is completed.
